

Data Search Guidance Notes – Academic and Landowner Searches

1 Academic Searches

Information can be requested by researchers or students for a particular project or study. If data will be used to help conserve wildlife and will not be used for commercial gain, the data will usually be provided free of charge. However, SERC retains the right to charge a time based fee.

Searches can be made for single species, particular taxonomic groups, or mixed groupings of species.

Certain species records are regarded as sensitive and there is restricted access to precise location information for these records. See Appendix 2.

Searches can be made for the whole county, districts or geographic area but SERC reserves the right to review each request on a case by case basis and if the data asked for is deemed to be excessive then a charge may be made.

We will provide an excel spreadsheet of the records requested. A map showing the distribution of the results of your search can also be requested if needed.

This standard information is provided to researchers and students free of charge, if further information is needed, or the information will be used for a commercial venture you may be referred to the Commercial request data search options, request form and charging structure.

2 Landowner Searches

Landowners may request a landowner data search for all species and site designations **within** the boundary of their property. A map clearly showing the boundary of the land holding **must** be supplied in all cases and the request must be made by the landowner themselves. No search will be undertaken without this.

We will provide the following:-

- Species records including details of abundance, stage, and statuses provided in Excel format.
- Mapped locations of the species records in relation to the search area – Species Map (pdf)
- Locations and boundaries of designated sites – Sites map (pdf)
- Summary details of designated sites (including reasons for designation where available for Non Statutory Sites) – Site details report (pdf)

Additional information (available on request)

- Assessment forms/survey reports for Non Statutory Sites [where available].

This standard information is provided to landowners free of charge, if further information is needed please refer to the commercial request data search options, request form and charging structure.

3 Species Search Information

The search will include our standard search option. See Appendix 1 for the species designations included. Those that have a designation will be identified in the information provided.

Certain species records are regarded as sensitive and there is restricted access to precise location information for these records. See Appendix 2.

4 Site Search Information – for Landowners only

SERC holds information for sites evaluated for their biological and geological interest, including all those with statutory or non-statutory designations. Our standard search option is for all statutory and non-statutory designated sites.

Statutory Sites that are searched for are:-

- Ramsar Sites
- Special Areas of Conservation (SAC)
- Special Protection Areas (SPA)
- National Nature Reserves (NNR)
- Sites of Special Scientific Interest (SSSI)
- Local Nature Reserves (LNR)

Non Statutory Sites that are searched for are:

- Local Wildlife Sites (LWS)
- Candidate Local Wildlife Sites (cLWS)
- Local Geological Sites (LGS)

5 Habitat Search

Standard information provided

- Our standard search option for habitats is a map showing the location and boundaries of priority habitats as defined in the UK Biodiversity Action Plan

6 Ecological Networks

Standard information provided

Our standard search option for Ecological Networks is a map showing the location and boundaries of Somerset's strategic ecological networks that have been produced for four broad habitat types in Somerset:

- Broad-leaved woodland
- Priority grasslands (including calcareous, acid and neutral grassland)
- Heathland and acid grassland
- Fen, marsh and swamp

The networks were created using the BEETLE least-cost network model developed by Forest Research with the parameters of the model based on the requirements of Somerset Priority Species for the minimum area needed to maintain a healthy population and typical dispersal distances.

7 Search Results

- The results are returned via email.

Additional information (available on request)

- Copies on paper can be supplied, but this will incur a charge.

8 Data sources

Data is compiled by SERC on an ongoing basis from all available professional and voluntary sources. These sources include the various specialist recording groups that operate in the county, linked to SERC and the Somerset Wildlife Trust, for which SERC acts as a clearing house for the supply of data. There is therefore no need for users to contact these groups separately.

The data search is undertaken only on data held and compiled by SERC at the time the enquiry is made.

9 Data Quality and Interpretation

All users of biological data should be aware of the interpretation limitations of the data supplied. Habitat and species recording coverage is far from complete in time and space and further field survey may be required to determine the presence of important features. It is only possible to supply records that have been collected and validated. The ecological condition of a site may have changed since the available records were collected – clearly this is especially the case for older records. The available records may often therefore be viewed as a guide to the present condition of a site or area rather than a definitive statement of its value.

Data supplied by SERC has been verified (in terms of identification accuracy) and validated (in terms of geographical accuracy and other accuracy attributes in the data capture process) as far as possible. Errors cannot be totally eliminated, however, and users are asked to check with SERC if possible errors are noted in the data search results.

SERC does not advise enquirers on actions that might or might not be taken as a consequence of the data identified in the search.

10 Requests

Enquirers must fill out a Data Request Form, which can be returned to: data.supply@somerc.com

Alternatively the form can be sent to the following address:

Somerset Environmental Records Centre
34 Wellington Road
Taunton TA1 5AW

11 Turnaround and Results

Data searches will normally be supplied to enquirers within 10 working days from receipt of your request form. However at busy times priority will be given to Commercial searches.

Somerset Environmental Records Centre

34 Wellington Road, Taunton TA1 5AW

Tel: (01823) 664450 E-mail: data.supply@somerc.com

Website www.somerc.com

Results are emailed in the format of pdf and excel spreadsheets. If you require hard copies of any of the results output then this will incur a charge to cover printing, postage and packing - if requested, separate contact will be made regarding payment details.

12 Charges and Payment Terms

The charges SERC makes for processing requests are to cover the time it takes staff to extract, analyse and supply data to the enquirer. This is not a charge for the data. SERC reserves the right to recoup a proportion of the costs of acquiring and managing data from its users, within the scope of maintaining charges at a reasonable level. A proportion of income from this source is used to promote voluntary recording activity in Somerset.

Whilst these requests for academic research and landowners are normally free of charge, SERC retains the right to charge a time based fee. If applicable a quotes will be provided on an individual basis and payment made be requested prior to the search being undertaken. SERC will not invoice 3rd parties for data searches. Invoices will be issued only to the individual requesting the data.

Terms of Payment: - strictly 30 days from date of invoice

Appendix 1 - Species Designations and information provided.

- Records are provided as:-

High resolution records – those with grid reference recorded at 100 m precision or better.

Most have 6-figure grid references; a few have 8-figure or 10-figure.

Low resolution records – those with grid reference recorded at 1 km or lesser precision.

When recording on large sites it's common practice to allocate species lists to 1 km grid squares or tetrads (2 km x 2 km).

Some recording schemes, e.g. those for plants and birds, only require recording at this level of precision, atlas projects are one of the main sources for low resolution records.

Site or location details may more precisely pin-point where the record was made.

This dataset includes some records original recorded at high resolution that have been reduced to low resolution precision in accordance with our confidential species policy

Species Designations

Key	Status	Assumptions Made
European Protected	Protected under European legislation	Includes:- Berne Convention Appendix 1 & 2 Bonn Convention Appendix 1 & 2 Habitats and Species Directive – Annex 4
European Priority		Includes:- Birds Directive Annex Habitats and Species Directive Annex 2 Priority Species
Red Listed	Species identified by the IUCN as being threatened or having a high risk of extinction.	Lower risk - least concern IUCN species are not considered Red Listed. Includes:- Critically Endangered Endangered Vulnerable Data Deficient Near Threatened
Wildlife and Countryside Act (WACA) 1981	Legally Protected under the WACA 1981.	Includes:- Schedule 1 Part 1, Part2 WCA: Schedule 5 Section 9.1 (killing/injuring) Schedule 5 Section 9.1 (taking) Schedule 5 Section 9.2 Schedule 5 Section 9.4a Schedule 5 Section 9.4b Schedule 8
Natural Environment and Rural Communities (NERC) Act 2006 Section 41	Legally Protected under the NERC Act 2006	List of habitats and species of principal importance for the conservation of biodiversity in England. The list includes 56 habitats and 943 species draws upon the UK BAP.
Nationally Scarce	Nationally Scarce Species.	Limited to Nationally Scarce only.

Website www.somerc.com

Key	Status	Assumptions Made
Amber Birds	Medium Conservation Concern.	Amber List species.
Red Birds	High Conservation Concern.	Red List species
BAP2007	Present on the Priority Species List for the UK Biodiversity Action Plan.	Includes national Biodiversity Action Plan or Priority species.
Local BAP2009	Species of biodiversity importance designated by local ecologists.	Includes species considered of importance by a local panel of ecologists including those from local authorities and with reference to local experts. This is an update of the previous 2007 list
County Notable	County Notable from the SERC Somerset Notable Species Dictionary (Fifth Edition).	Species present on the Somerset County Notable list.

Appendix 2 - Species records which SERC regards as confidential

Birds		Agreed resolution	Reason
Acanthis cabaret	Lesser Redpoll	Maximum geographical precision of supplied records: 2km. Note: this is applied to all records.	Sensitive Species
Accipiter gentilis	Goshawk		
Alcedo atthis	Kingfisher		
Anas querquedula	Garganey		
Ardea alba	Great White Egret		
Ardea purpurea	Purple Heron		
Asio flammeus	Short-eared Owl		
Asio otus	Long-eared Owl		
Athene noctua	Little Owl		
Bubulcus ibis	Cattle Egret		
Calidris alpina	Dunlin		
Charadrius hiaticula	Ringed Plover		
Ciconia ciconia	White Stork		
Circus aeruginosus	Marsh Harrier		
Circus pygargus	Montagu's Harrier		
Coccothraustes coccothraustes	Hawfinch		
Coturnix coturnix	Quail		
Crex crex	Corncrake		
Dendrocopos minor	Lesser Spotted Woodpecker		
Egretta garzetta	Little Egret		
Emberiza calandra	Corn Bunting		
Emberiza cirius	Cirl Bunting		
Falco columbarius	Merlin		
Falco peregrinus	Peregrine		
Falco subbuteo	Hobby		
Grus grus	Crane		
Jynx torquilla	Wryneck		
Lagopus lagopus	Willow Ptarmigan		
Lanius collurio	Red-backed Shrike		
Locustella luscinioides	Savi's Warbler		
Lullula arborea	Woodlark		
Mergus merganser	Goosander		
Milvus milvus	Red Kite		
Nycticorax nycticorax	Night-heron		
Oriolus oriolus	Golden Oriole		
Panurus biarmicus	Bearded Tit		

Somerset Environmental Records Centre

34 Wellington Road, Taunton TA1 5AW

Tel: (01823) 664450 E-mail: data.supply@somerc.com

Website www.somerc.com

Pernis apivorus	Honey-buzzard		
Phoenicurus ochruros	Black Redstart		
Podiceps nigricollis	Black-necked Grebe		
Poecile montana	Willow Tit		
Porzana porzana	Spotted Crake		
Pyrrhocorax pyrrhocorax	Chough		
Recurvirostra avosetta	Avocet		
Regulus ignicapilla	Firecrest		
Riparia riparia	Sand Martin		
Saxicola rubetra	Whinchat		
Scolopax rusticola	Woodcock		
Sterna hirundo	Common Tern		
Sterna sandvicensis	Sandwich Tern		
Sylvia undata	Dartford Warbler		
Tadorna tadorna	Shelduck		
Tetrao tetrix	Black Grouse		
Tringa glareola	Wood Sandpiper		
Tringa totanus	Redshank		
Tyto alba	Barn Owl		
Upupa epops	Hoopoe		

Mammals		Agreed resolution	Reason
Lutra lutra	Otter	Maximum geographical precision of supplied records: 1km.	(breeding/lying up sites only)
Meles meles	Badger	Maximum geographical precision of supplied records: 1km.	(sett records only)
All bat species		Maximum geographical precision of supplied records: 100m	

Somerset Environmental Records Centre

Tel: (01823) 664450 E-mail: data.supply@somerc.com

Website www.somerc.com

Butterflies		Agreed resolution	Reason
Phengaris arion (Maculinea arion)	Large blue	Maximum geographical precision of supplied records: 2km.	Sensitive Species

Molluscs		Agreed resolution	Reason
Segmentina nitida	A ramshorn snail	Maximum geographical precision of supplied records: 2km.	Very restricted distribution in the UK.
Valvata macrostoma	A valve snail	Maximum geographical precision of supplied records: 2km.	1997 BAP, internationally threatened.
